

# Su Casa Properties

We are concerned about our **environment.**

That is why we are proud to announce that we recycle the carpet in your new home. We only buy carpet that is made from 100% recyclable nylon fiber. New technology now allows us to turn your old carpet into new again and again, like water to ice and back to water. This is just another reason why we are the best choice in new homes for anyone who cares about keeping our world beautiful.

We are serious about reducing our footprint on the environment, and we make it easy for you to do the same. By choosing to recycle our carpet, we are diverting over 6 tons of carpet from landfills per year on average. Now you too can help make our planet a little bit better.

- No added work or cost for you
- Same great look & quality
- Same great performance

- Reduced greenhouse emissions
- Reduced water consumption
- Reduced energy consumption
- Reduced oil consumption
- Reduced carpet to landfills
